## Employment

---

### Frontend Developer at Harbr

2018-2019

- Worked on an existing React JavaScript application, coordinating with a team to refactor existing functionality, implement a visual redesign, and deliver new features to our customers on tight deadlines.
- Led development on a new React Native mobile application, delivering a fully-featured experience to customers in 3 months.

### Software Developer at SEG Consulting

2018

- Worked with a small team and in direct communication with clients to develop new features and resolve issues on PHP & React codebases.
- Developed new features on a NodeJS Express & MongoDB based server application.
- Co-developed a responsive frontend React web application, implementing a supplied design on both mobile and desktop.

### Software Developer at Brave New World

2017-2018

### Co-op Software Developer at Brave New World

Spring 2016 & Fall 2016

- Worked with a team to develop applications for clients in a variety of technologies, including React, React Native, AngularJS, Django, & NodeJS.
- Developed an iPhone application in React Native to control a small robot's display and speakers, along with a corresponding Django API application for accessing a database of user-created sounds and images.

## Education

---

Bachelor of Computer Science, Dalhousie University - GPA: 3.7

2018
