## Employment

---

### Software Developer at SEG Consulting

2018 - Present

- Worked with a small team and in direct communication with clients to develop new features and resolve issues on PHP & React codebases
- Developed new features on an Express & MongoDB based server application
- Co-developed a responsive frontend React web application, implementing a supplied design on both mobile and desktop

### Software Developer at Brave New World

2017-2018

### Co-op Software Developer at Brave New World

Spring 2016 & Fall 2016

- Worked with a team to develop applications for clients in a variety of technologies, including React, React Native, AngularJS, Django, & NodeJS
- Led front-end development on a responsive React landing page for a high profile client
- Developed an iPhone application in React Native to control a small robot's display and speakers, along with a corresponding Django server application acting as an API for accessing a database of user-created sounds and images

### Co-op Software Developer at Intricate Group

Summer 2015

- Developed features and resolved issues within a large pre-existing Spring codebase
- Led quality assurance and issue resolution on an existing Android application, delivering updates to field workers
